Description

DisplayPort 1.2 one(1) fiber optic detachable extender, DPFX-700, extends DisplayPort 1.2 signal up to 200m (656feet) and transmits 4K UHD (4096x2160) at 60Hz over one(1) LC multi-mode fiber. Cutting-edge technology of Opticis reduces limits in installation by providing an option for longer copper extension.

DPFX-700-TR transmit uncompressed and transparent data signal even when used with up to 3 m copper cable as an intermediary. This enables installation of the product in the limited spaced area in such our small module type extender cannot be used. 2m copper cable is provided in the shipping group.

Furthermore, to meet all the needs of the customers, DPFX-700-TR is fully interoperate with using DPFX-300 as a pair. Depending on the circumstances, customer can choose to use direct connection type module on one side, and copper extension type module on the other side.

DPFX-700-TR gives slim, light, and easy installation with perfect electrical isolation, but without electrical hazard and interference. It is operated external DC power adapter which is supplied in the shipping group.

The shipping items are shown as follows;

- 1) One (1) Transmitter (Tx) and One (1) Receiver (Rx)
- 2) Two (2) 2m Male to Male DisplayPort copper cable
- 3) Two (2) 5V 1A power adapter
- 4) User Manual

※ If the purchase was made with mixed pair of DPFX-700 and DPFX-300, the shipping group may vary.

※ In shipping group, two 2m copper cables are included. Contact the regional sales representative or tosales@opticis.com for using 3m copper cable.
